

John Deere E1000 Dripper

The John Deere E1000 Online Dripper is a non-regulated dripper with several key features that allow you to create the right irrigation system for your operation. Starting with the E1000 Online Dripper's two-part body construction, the E1000 can be disassembled and easily maintained in the field.

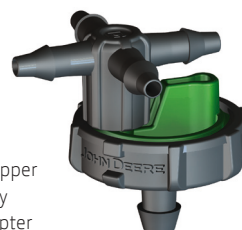

All of the E1000 Online Drippers have a multi-function port, providing numerous connection options for system components. Even the low profile of the E1000 Online Dripper helps to keep the irrigation system out of the way of everyday work. And with the colour coding of the E1000 Online Dripper, you'll easily know how to identify the flow rate.

Features

- E1000 can be disassembled for cleaning
- Multi-function port allows use of different type of connectors

Technical Specifications

- Flow rates at 100 kPa: 2.0, 4.0, 8.0 lph
- Operating pressure range: 80–200 kPa
- Cover colour indicates the flow rate
- Installation: 2 mm punch tool

E1000 Online Dripper shown with 4-way multi-branch adapter

Description	Outlet Type	Flow (lph)	Outlet Colour	Product Number
John Deere E1000 Dripper 2 lph	Multi-function outlet – for use with John Deere Water single, 2 & 4 way branching adapters	2	Brown	201013383
John Deere E1000 Dripper 4 lph		4	Black	201013385
John Deere E1000 Dripper 8 lph		8	Green	201013386

Each bag of 1,000 John Deere E1000 drippers contains 1 x E1000 tool for easy dripper cleaning.

Flow Rate (lph) vs. Pressure (kPa)

Pressure (kPa)	John Deere E1000 2.0lph	John Deere E1000 4.0lph	John Deere E1000 8.0lph
80	1.83	3.59	7.19
100	2.03	4.01	8.02
120	2.21	4.38	8.78
140	2.39	4.74	9.48
160	2.54	5.06	10.13
180	2.69	5.37	10.74
200	2.83	5.66	11.33
